WELD - 85 STRUCTURE DESIGN AND FABRICATION (REVISED)

WELD - 88 WELDING TECHNICAL PROBLEMS (REVISED)

TABLED (UNTIL 2.2.18 Meeting)

EMT 510 - BASIC LIFE SUPPORT AND CPR, (NEW)

Tabled for the first time on 11.3.17 because there was not a faculty representative present

Description: The American Heart Association's new basic life support course includes science and education from the 2015 Guidelines Update for CPR and ECC. This course teaches both single-rescuer and team basic life support skills for application in both prehospital and in-facility environments, with a focus on high-quality CPR and team dynamics.

Rationale for Revision: CPR is required for entry into the EMT program. CPR taken at Yuba will be a pre-requisite for entry into EMT 61 and Fire Academy. CPR courses are also required for Nursing.
