Thanks. I'll add it to the documents for us to look at. I'll post the agenda on our website (tomorrow) and include the info there.

Subject: MATH 20/MATH 9 textbook links to OER

Meridith-

Here is the info about textbooks from Mark:

The department mostly uses OER, so we've decided to go with the following for Math 20:

"<https://openstax.org/details/books/college-algebra-2e> or equivalent"

And for Math 9:

"[https://math.libretexts.org/Bookshelves/Calculus/Applied_Calculus_\(Calaway_Hoffman_and_Lippman\)](https://math.libretexts.org/Bookshelves/Calculus/Applied_Calculus_(Calaway_Hoffman_and_Lippman)) or equivalent"

I'm not sure the format for how curriculum should have the OER books, so I just put the URLs if that's ok.

Mark T. Lydon, Ph.D

Professor of Mathematics & Statistics
